

self-priming cast iron shallow well jet pumps

The Projet" HN models provide excellent performance with good pressure for wells to 25' deep. Self-priming after the priming chamber has been filled with water.

APPLICATIONS

 Water systems and sprinkling... for homes, farms and cottages.

SPECIFICATIONS

Max. Liquid Temperature – 140°F Max. Inlet Pressure – 50 PSI Average Priming time at 15 feet – HNC = 1.7; HND = 1.1; HNE = 1.3 Average Priming time at 25 feet – HNC = 4.4; HND = 4.4; HNE = 2.6

Body - Close-grained cast iron

Nozzle - High strength Lexan® Venturi - Lexan®

Impeller - Norvi®

Diffuser – Reinforced polypropylene

Shaft - One-piece threaded, 416 grade stainless steel

Base - Steel, 12 gauge

| Catalog Number | НР | Switch Setting | Description | Pipe Tapping Sizes | | Motor | Approx. |
|-------------------|-----|-------------------|------------------|--------------------|--------|---------|---------|
| | | | | Suct. | Disch. | Voltage | |
| HNC | 1/2 | 30-50 | Shallow Well Jet | 1-1/4" | 1" | 115/230 | 47 |
| HND | 3/4 | 30-50 | Shallow Well Jet | 1-1/4" | 1" | 115/230 | 65 |
| HNE | 1 | 30-50 | Shallow Well Jet | 1-1/4" | 15 | 115/230 | 70 |

ProJet™ HN SERIES

FEATURES

Quality Construction - Closegrained cast iron body, specially treated for corrosion resistance. Drain port provided for easy winterizing.

Built-in Jet - High strength Lexan® nozzle and venturi for maximum resistance to corrosion and abrasion. Clean out plug provided for ease of service.

Noryl® Impeller – Precision-molded for perfect balance... ultra-smooth for highest performance and efficiency.

Precision Molded Diffuser – Pump primes faster, handles more air, with multi-port, precision-molded, reinforced polypropylene diffuser.

Mechanical Shaft Seal – Precision lapped and highly polished carbonceramic, stainless steel construction. Internal design guarantees continuous water lubrication.

Motor Windings – Superior insulation materials protect against excessive moisture and contaminants... assure prolonged motor life.

Balanced Rotor – Die cast under high pressures for uniform performance and greater efficiency, dynamically balanced.

Heavy-duty Ball Bearings – Shielded, permanently lubricated bearings, extensively tested to ensure extended life and smooth, quiet operation.

Pump and Motor Shaft – Stainless steel for maximum corrosion resistance; one-piece threaded shaft for positive impeller drive and alignment. Pressure Switch – Professional quality, allows cut-in and differential adjustments.
