

self-priming cast iron convertible jet pumps

Pressure Gauge (included)

The ProJet" HL convertible jet pumps offer a proven cast iron self-priming design available in 1/2-1 HP models. The ProJet HL convertible jets utilize built-in regulators offering easier priming and better range of performance from a complete line of shallow well, 4" double pipe, 2" and 3" single pipe jet packages.

APPLICATIONS

 Water systems and sprinkling... for homes, farms and cottages.

SPECIFICATIONS

Body and Seal Plate - Close-grained cast iron

Impeller – High strength Noryl®
Diffuser – Reinforced polypropylene
with brass wear ring

Shaft – One-piece threaded 416 stainless steel

Base - Steel, 12 gauge

Max. Liquid Temperature – 140°F Max. Inlet Pressure – 50 PSI

Pressure Switch Pre-Set - 30-50 PSI

Suction Ports – "Suction-over-Drive" Pressure Gauge – 0-100 PSI

ORDERING INFORMATION							
Catalog Number	НР	Description	Pipe Tapping Sizes			Motor	Approx.
			Suct.	Drive	Disch.	Voltage	Wt. Lbs.
HLC	1/2	Deep Well Jet	1-1/4"	1"	1"	115/230	42
HLD	3/4	Deep Well Jet	1-1/4"	1.	1"	115/230	60
HLE	1	Deep Well Jet	1-1/4"	1"	1"	115/230	65

A Jet Package should be ordered with every Series HL Pump.

NOTE: Pumps installed with a PRO-Source™ tank require a 100 PSI relief valve. Pumps installed with a conventional tank require a 75 PSI relief valve. Relief valve must be capable of relieving flow of pump at relief pressure.

Noryl® is registered trademark of General Electric Co. ProJet™ and PRO-Source™ are trademarks of Pentair Water.

In order to provide the best products possible, specifications are subject to change.

PROJET"

FEATURES

Quality Construction – Closegrained cast iron pump body, is rugged one-piece unit, specially treated to resist corrosion. Drain port provided for easy winterizing.

Noryl® Impeller – Precision-molded for perfect balance... ultra-smooth for highest performance and efficiency.

Precision Molded Diffuser – Pump primes faster, handles more air, with multi-port, precision-molded, reinforced polypropylene diffuser.

Pressure Switch – High quality, cut-in and differential pressure setting are adjustable.

Mechanical Shaft Seal – Precision lapped and highly polished carbon-ceramic, stainless steel construction. Internal design guarantees continuous water lubrication for maximum protection.

Motor Windings – Superior insulation materials protect against excessive moisture and contaminants... assures prolonged motor life.

Balanced Rotor – Die cast under high pressures for uniform performance and greater efficiency... dynamically balanced.

Heavy-duty Ball Bearings – Shielded, permanently lubricated bearings, extensively tested to ensure extended life and smooth, quiet operation.

Pump and Motor Shaft -416 stainless steel for maximum

416 stainless steel for maximum corrosion resistance; one-piece threaded shaft for positive impeller drive and alignment.
